Title:

The Global Health Intelligence

Character Limit: 70

Description:

Current concerns about the spread of infectious diseases, especially unexpected ("emerging") infections such as pandemic influenza or severe acute respiratory syndrome (SARS), have renewed focus on the critical importance of global early warning and rapid response.

Character Limit: 3735

Add Query Group

Edit

- Multi-Select**  
A unique query type with up to 26 possible responses that allows respondents to select the best possible response(s) from the options provided.

---

- Open Text**  
A unique query that allows for one single, multi-line or calendar date free-text response.

---

- Patient-Data Capture**  
A standard query that allows respondents to enter a response or automatically populate a response from the respondent's record.

---

- Vital Signs**  
A pre-programmed query with associated risk ranges.

- Statement**  
An informative message that does not require a response.

---

- Post Submit Message**
